About us

Multi Organics Pvt Ltd, established in 1976 and based in India, is a leading manufacturer of Speciality Chemicals and Advanced Intermediates with a global customer base. Our expertise in innovative process chemistry, scale-up and process engineering along with razor sharp focus on resource efficiency ensure low-cost products. We manufacture Specialty Chemicals and Advanced Intermediates used in Pharmaceuticals / APIs, Agrochemicals / AIs, Colorants (Pigments, Dyes, Food Colors), Electronic Chemicals, Aviation Chemicals and Paper Chemicals. We work with more than 50 Global Chemical Companies for their Raw Material requirements and Custom Synthesis / Contract Manufacturing projects.

Flexible Manufacturing Solutions for Custom Synthesis and Contract Manufacturing

Infrastructure

DEDICATED PRODUCT PLANTS

MULTI-PURPOSE PLANTS

ADVANCED R&D AND QC LAB

PILOT / SCALE-UP LAB

PROCESS ENGINEERING LAB

Innovative Deep Chemistry, Efficient Process Design

Only an optimum blend of both can result in long-term competitive costs

Safe, Reliable, Environmentally conscious Manufacturing

Non-negotiable parameters guiding our operations

Pushing Resource Efficiency to its highest limits

4R Principal - Reduce, Reuse, Recycle, Recover whether its water, energy, fuel, raw materials or equipment.

People, our greatest assets

We have decades of expertise in

- New Product Development
- Customized Process Development, Scale-up and Exclusive Manufacturing
- High Volume Manufacturing (Dedicated Plants)
- Speciality Chemical Campaigns (Multi purpose plants)
- Cost-efficient Plant Design and Operations
- Continuous Improvements, Process Intensification
- Low cost ZLD and Effluent management
- Safely handling Hazardous materials
- Intellectual Property Rights support for global markets

Sustainability

Relentless focus on increasing Resource Efficiency

4R Principle - Reduce, Reuse, Recycle, Recover

100,000 trees in 24 months towards Carbon Sequestration

Strategy to achieve Carbon Neutrality by 2030

30 years of community work via in-house Charity, CSR projects

SINCE 1976

500+ STRONG TEAM

CUSTOMERS IN 24 COUNTRIES

NOT JUST NAPHTHALENE CHEMISTRY

CHEMISTRIES

PLANT SCALE

- Sulphonation
- Caustic Fusion
- Carboxylation
- Nitration
- Chloro Sulphonation
- Halogenation (F, Cl, Br)
- Hydrogenation
- Cyanation
- Diazotisation
- Oxidation,
- Chiral Chemistry
- Hydrolysis
- Alkylation
- Acetylation / Acylation
- Kolbe Schmidt Reaction
- and many more

SMALL SCALE

- Aldol Condensation
- Bromination / Sandmeyer
- Butyl Lithium Reaction
- Boron Chemistry
- Fluorination
- Bromination
- Chlorination
- Halex
- and many more
